The challenge

Every law firm is different. But every law firm experiences the same issues, time and time again.

Productivity

“Because I have to wear so many hats and oversee every daily task, I have less and less time to focus on giving my clients the service they’re paying for.”

Compliance

“The rules seem to shift every day, and there’s no way I can stay on top of all the latest changes in the minefield that is compliance.”

Cost

“I’m paying huge amounts of overheads on wages for staff members whose workloads are barely ever at full capacity. It’s not cost efficient.”

Growth

“The more successful we get, the bigger my law firm grows, and the harder it is to keep all of our departments and people linked together.”

Efficiency

“The amount of time I spend looking for important documents or reconciling money means there are never enough hours in the day to get everything done.”

But with Quill...

Those issues can be a thing of the past.

Productivity

"Now that Quill takes care of all those distracting daily tasks, I can focus on doing what I do best - servicing clients - without the headache."

Compliance

"The team members at Quill are all experts in their chosen fields, taking the time to stay up to date with the latest compliance changes so that I don't have to."

Cost

"Thanks to Quill's pick and mix software licensing together with its flexible pay-as-you-go services model, I only pay for the software and services that I actually need, as and when I need them."

Growth

"Quill's full range of capabilities means we can rely on them more and more as we grow, and their software is completely scalable as well."

Efficiency

"The seamless integration of Quill's software and services means we've streamlined all of our front- and back-office tasks, giving us more time to focus on what matters."

More than just software

What makes Quill unique is our joined-up approach to legal software and outsourced legal services.

Don't just take our word for it!

Our unique combination of software and services helps hundreds of clients manage their law firms each and every day. Just take a look at some of their stories.

"There are so many advantages of DocsHub for our company. We store well over 100,000 documents in the cloud. All we need is an internet connection, and this mass of files is readily available to our managers, lawyers and support staff.

The financial benefits of document management systems are substantial, in terms of server equipment alone."

Gary McIndoe, Director, Latitude Law

At Luqmani Thompson, we're on a mission to go fully digital. We certainly encourage other firms we speak to, to get on board the train too before it leaves the tracks. Where our business is concerned, it's Quill's DocsHub powering the engine."

Jawaid Luqmani, Partner, Luqmani Thompson and Partners

"When I set up my practice, I'd just come out of a big law firm which had a huge internal IT support department. Obviously I can't afford this on my own, yet I still have similar practice and document management requirements.

Quill's systems give enterprise-level functionality without the cost and trouble of hosting and maintaining it myself."

Lynne Passmore, Solicitor, Lynne Passmore Family Law

Your team becomes less reliant on a physical office and can work anytime and anywhere.

Don't just take our word for it!

Our unique combination of software and services helps hundreds of clients manage their law firms each and every day. Just take a look at some of their stories.

"Rather than employing a receptionist or administrator, we signed up for Quill Post. The price is astonishingly good, and we're saving both salary overheads and ten hours a week of fee-earning time by not processing post in our offices.

Quill Post handles both our inbound and outbound mail. Our post is redirected to Quill and then opened, scanned and emailed to recipients every day with the physical post couriered to our office once weekly.

For our outbound post, we simply generate covering letters and attachments as we normally would in Quill, and instead of sending to our physical office printer, we select the virtual printer.

As with all of Quill's technology, Quill Post gives us the tools to be optimally productive, utilising every fee earning minute as it should be – servicing clients.

We absolutely love it!"

Our unique combination of software and services helps hundreds of clients manage their law firms each and every day. Just take a look at some of their stories.

"Documents are flawless. The ability to dictate from wherever you like is a huge bonus. We dictate from car parks between meetings, court before hearings, home out of hours, anywhere. This means we've cut down on dead time because we're able to utilise every spare minute of the working day. No time's wasted. We've maximised efficiency in the process."

Claire Horsfield, Affiliate Legal Executive, Bridge Employment Law

"Our previous methodology was inefficient, wasting both fee earner and administration time. It's much quicker dictating into machines. The whole process is much more streamlined and saves no end of time. Plus we have Quill's backing when our workload gets hectic. It's the ideal set up."

Stuart Jones, Conveyancer, Robert Simmons Solicitors

"When court and other deadlines are mounting, Type brings immense peace of mind. As a business, we're trying to work smarter during our contracted hours. Type is a pivotal part of this strategy. What we don't get done by close of business, we outsource to Type. After a busy day in the office and at court, it's so nice being able to relax and unwind."

Martin Stafford, Director, SDM Legal
